

*Reporting...
the way you want it*

Report Wizard

Benefits

- Create an unlimited number of WebPDM printouts that fit your business processes
- Reduce dependence on technical staff to create custom reports
- No need to re-compile and re-deploy reports when upgrading WebPDM
- All data from WebPDM, including images, can be made available for reports
- Create reports from one WebPDM page or across many folders

Create quick & easy custom WebPDM output

Gerber Technology's WebPDM is a world-class software application that has helped standardize the product specification process in companies throughout the apparel industry. However, the reporting requirements for these product specifications can vary widely from company to company. Singletree Technologies has created a report wizard for WebPDM that allows you to quickly and easily create custom WebPDM output without the need for technical assistance.

Features:

- Data templates, a set of data for a particular form or data table application, are used to create reports
- Create reports by dragging and dropping data fields from the templates
- Report set up is performed in a WYSIWYG environment (what you see is what you get)
- Choose from predefined data templates that are available for each WebPDM form
- Change field size, field position, font size, color, borders and shading of each report field
- Create an unlimited number of custom reports without the need for additional licenses
- Reports run in the Active Reports Print Engine so it is completely integrated with WebPDM
- The reports and printouts are available in WebPDM immediately after saving
- Using WebPDM security, you can make these reports available to whomever you wish
- Data templates are sold in bundles so you buy what you need
- Custom data templates can be created to suit your specific requirements

Cost Analysis Report									
Season: Fall 2005									
Style	Description	Prod Units	Fabric Cost	Line Price	Total Cost	Est Price	Est Cost	Margin %
